UKIEE 2027

Project & Procurement Marketplace - Where Energy Projects Meet
Delivery Capability

MAGAZINE LONDON | 24-27 MAY 2027

International Energy Exhibition London 2027 | www.ukiee.com

Magazine London | 24-27 May 2027

Where energy projects meet delivery capability

UKIEE 2027 brings governments, utilities, project owners and procurement organisations together with manufacturers, EPC/EPCM contractors, engineering companies, technology providers, investors, specialist suppliers and other organisations involved in project delivery.

PROJECT SIDE

Governments, utilities and project owners can introduce publicly discussable projects, procurement context and delivery needs.

DELIVERY SIDE

Industry presents engineering, equipment, technology, manufacturing, project-delivery, finance and specialist capability.

THE PROJECT ROOM

A business environment for direct discussion around authorised public-facing project information.

THE EXHIBITION FLOOR

A place for companies to demonstrate capability, build relationships and meet international decision-makers.

CORE PRINCIPLE

UKIEE creates the environment. The parties decide whether further engagement is worthwhile. Formal procurement remains outside UKIEE.

Six project functions define UKIEE 2027

Technologies, equipment and services are organised by the project function they serve and the practical requirements of energy and infrastructure delivery.

1 | PROJECTS & PROJECT READINESS

Project pipelines, feasibility, pre-FEED, FEED, site and connection readiness, execution planning and project controls.

2 | ENGINEERING & PROJECT DELIVERY

EPC, EPCM, PMC, design, construction, systems integration, commissioning, interfaces, schedule and cost control.

3 | PROCUREMENT & SUPPLY

Technical specifications, sourcing, procurement packages, supplier engagement and project supply-chain requirements.

4 | TECHNOLOGY & PROJECT INTEGRATION

Testing, certification, standards, interoperability, deployment evidence, technical integration and implementation risk.

5 | ASSET OPERATIONS & RELIABILITY

Asset integrity, inspection, maintenance, controls, OT cybersecurity, operational AI and lifecycle performance.

6 | INTERNATIONAL PROJECT SUPPLY & PARTNERSHIPS

International market entry, local content, EPC partnerships, specialist subcontracting, finance and logistics.

Project environments

Power generation | Grid & substations | Energy storage & flexibility | Critical power & data centres | Industrial energy systems | Firm & complex power | Low-carbon infrastructure | Existing asset upgrades

Bring the project. Explain the requirement. Meet the capability.

Governments, utilities, public authorities and project owners can introduce authorised public-facing information about existing, planned or forthcoming projects. Relevant international organisations can hear the project and discuss whether their capability or interest may be relevant.

1 | INTRODUCE

The project owner decides what public-facing information it is authorised and comfortable to present.

2 | HEAR

Participating organisations review or hear that information directly.

3 | DISCUSS

Relevant companies or institutions ask questions and explain capability or interest.

4 | CONTINUE DIRECTLY

Where there is mutual interest, the parties continue directly through their normal procedures.

PUBLIC INFORMATION ONLY

UKIEE does not require confidential tender documents, non-public procurement information or restricted project files.

Boundary

UKIEE does not select or qualify suppliers, conduct tendering, evaluate bids, negotiate on behalf of project owners, make investment decisions, award contracts or guarantee meetings or commercial outcomes.

Practical environments for project and industry engagement

EXHIBITION FLOOR

Physical stands for manufacturers, EPC/EPCM organisations, engineering companies, technology providers, suppliers and professional services.

THE PROJECT ROOM

Public-facing project introductions and direct business discussion between project owners and relevant organisations.

TECHNICAL DEMONSTRATION AREA

Approved demonstrations of equipment, systems, technical evidence, integration workflows and operating capability.

UKIEE CONFERENCE

A separate conference programme organised by Cranfield University, with detailed programme information being finalised for publication.

GOVERNMENT / VIP & PROJECT OWNER CENTRE

Space supporting government, institutional and project-owner participation within the event.

PROFESSIONAL NETWORKING

International business relationships, supplier-to-supplier cooperation, project partnerships and institutional engagement.

Public Project Intelligence

UKIEE also maintains a separate public-source Project Intelligence resource for market awareness. A listing in Project Intelligence does not imply that the project owner participates in UKIEE or has authorised a Project Room discussion.

Programme being developed

Cranfield University is organising the conference programme. The previous Day 1 / Day 2 / Day 3 structure is retired. Detailed themes, topics, formats, timings and contributors are being finalised and will be published when approved.

SEPARATE RESPONSIBILITIES

The exhibition, Project Room, commercial participation, exhibitor activities and wider UKIEE event operations remain organised and managed by UK Petroleum Co. Ltd.

Current position

Until the revised programme is published, earlier conference timetables or track allocations should not be treated as current. Confirmed contributor announcements are published only where the relevant relationship and publication permission are recorded.

Contributing

Relevant project owners, engineers, procurement and contracts professionals, technical authorities, EPC/EPCM/PMC specialists, operators, researchers and evidence contributors may register non-binding interest in contributing through the UKIEE website.

Bring or introduce a publicly discussable project

UKIEE welcomes ministries, public authorities, utilities, state-owned organisations, procurement bodies, project owners, investment agencies, embassies, trade missions and authorised delegations.

INTRODUCE A PROJECT

Bring authorised public-facing information about a relevant energy or infrastructure project.

REFER THE PROJECT OWNER

Where another public organisation owns the project, connect UKIEE with the responsible organisation.

PARTICIPATE IN DISCUSSION

Hear directly from international engineering, manufacturing, EPC, technology, finance and specialist organisations.

CONTINUE THROUGH NORMAL PROCEDURES

Any later procurement, qualification, investment, technical or contractual process remains with the responsible organisation.

No confidential information required

Project owners remain in control of what they choose to present. UKIEE does not require non-public procurement information and does not represent Project Room participation as a tender or supplier-selection process.

Present capability - not just brand presence

UKIEE is designed for organisations that can contribute to the definition, engineering, supply, technology, delivery or operation of energy projects.

ENGINEERING / EPC / EPCM / PMC

Design, engineering, construction, integration, commissioning and project execution.

OEMs & EQUIPMENT MANUFACTURERS

Transformers, switchgear, generation equipment, storage, pumps, compressors, controls and packages.

PROJECT SUPPLIERS

Cables, valves, instrumentation, packaged systems, site services and specialist supply.

SPECIALIST CONTRACTORS

Construction, installation, testing, commissioning and technical services.

TECHNICAL ASSURANCE

Testing, certification, inspection, validation, reliability and technical evidence.

ASSET OPERATIONS & RELIABILITY

Integrity, maintenance, condition monitoring, OT and lifecycle performance.

PROJECT LOGISTICS & PROFESSIONAL SERVICES

Freight, heavy-lift, contracting, insurance, export finance and specialist support.

DIGITAL & TECHNOLOGY

Operational technology, digital infrastructure, analytics and AI where tied to defined project or asset needs.

What exhibitors should be prepared to show

Relevant project references | standards/certifications | integration requirements | delivery geography | manufacturing or service capacity | lead times | warranties/performance position | project stages served.

Who UKIEE is designed to bring together

PROJECT & ASSET

Project owners, utilities, operators and developers.

ENGINEERING & DELIVERY

EPC, EPCM, PMC, engineering teams and construction organisations.

PROCUREMENT & CONTRACTS

Strategic sourcing, category, contracts and public/professional procurement teams.

OEMs & SUPPLY

Equipment manufacturers, project suppliers and specialist contractors.

OPERATIONS & RELIABILITY

Asset managers, integrity, maintenance, controls and OT professionals.

TECHNICAL & APPLIED RESEARCH

Testing, validation, technical specialists and project-relevant research.

International project supply and partnerships

Market entry | local content | international tender participation | EPC partnerships | specialist subcontracting | export finance & insurance | project logistics.

PROFESSIONAL VISITOR ADMISSION

Professional visitor admission is currently free. Registration of interest does not create a ticket or admission entitlement until final visitor arrangements are published.

Visibility and activation - not project access

Commercial partnerships are designed for organisations seeking approved event visibility, content, hospitality or activation around UKIEE 2027. They do not purchase access to non-public projects, project owners or procurement processes.

PRINCIPAL EVENT PARTNERSHIP High-level approved brand visibility and event association defined in writing.	PROJECT ROOM PUBLIC EXPERIENCE Approved visibility around the public Project Room environment without preferential project access.
TECHNICAL DEMONSTRATION AREA Approved brand/technical activation around demonstrations and evidence-led capability.	HOSPITALITY & NETWORKING Approved hospitality or networking activation defined by the commercial schedule.
INTERNATIONAL PROJECT SUPPLY ACTIVITY Approved visibility around international project-supply themes and professional audiences.	BESPOKE PARTNERSHIP A tailored activation developed around an agreed commercial objective and participant value.

COMMERCIAL BOUNDARY

Partnership does not confer procurement preference, supplier approval, guaranteed meetings with project owners, programme control, guaranteed speaking access or unrestricted participant data.

UKIEE 2027 - confirmed logistics

DATES

24-27 May 2027 - confirmed event dates.

VENUE

Magazine London, London, United Kingdom - confirmed and finalised venue.

ORGANISER

UK Petroleum Co. Ltd | Company No. 16903101.

FORMAT

International B2B exhibition + Project Room + conference + professional participation.

Participation

Expressions of interest remain open. Exhibition space, commercial partnerships and other participation arrangements are confirmed only in writing by the organiser. Programme details and operating arrangements continue to be updated as they are finalised.

Official information

Use www.ukiee.com as the authoritative current event source. Public partners and listing platforms should use the confirmed dates 24-27 May 2027 and Magazine London as the venue.

Projects. Capability. Direct business discussion.

International Energy Exhibition London 2027 is designed to connect publicly discussable project activity with the international organisations capable of engineering, manufacturing, supplying, financing and delivering energy and infrastructure solutions.

MAGAZINE LONDON | 24-27 MAY 2027

Professional visitor interest, exhibitor enquiries, Project Room participation and commercial-partnership information are available through the official website.
