GROUND FLOOR PLAN
Exhibition, Registration and Main Access

FIRST FLOOR (MEZZANINE) PLAN
Conference, Project Room and VIP Facilities

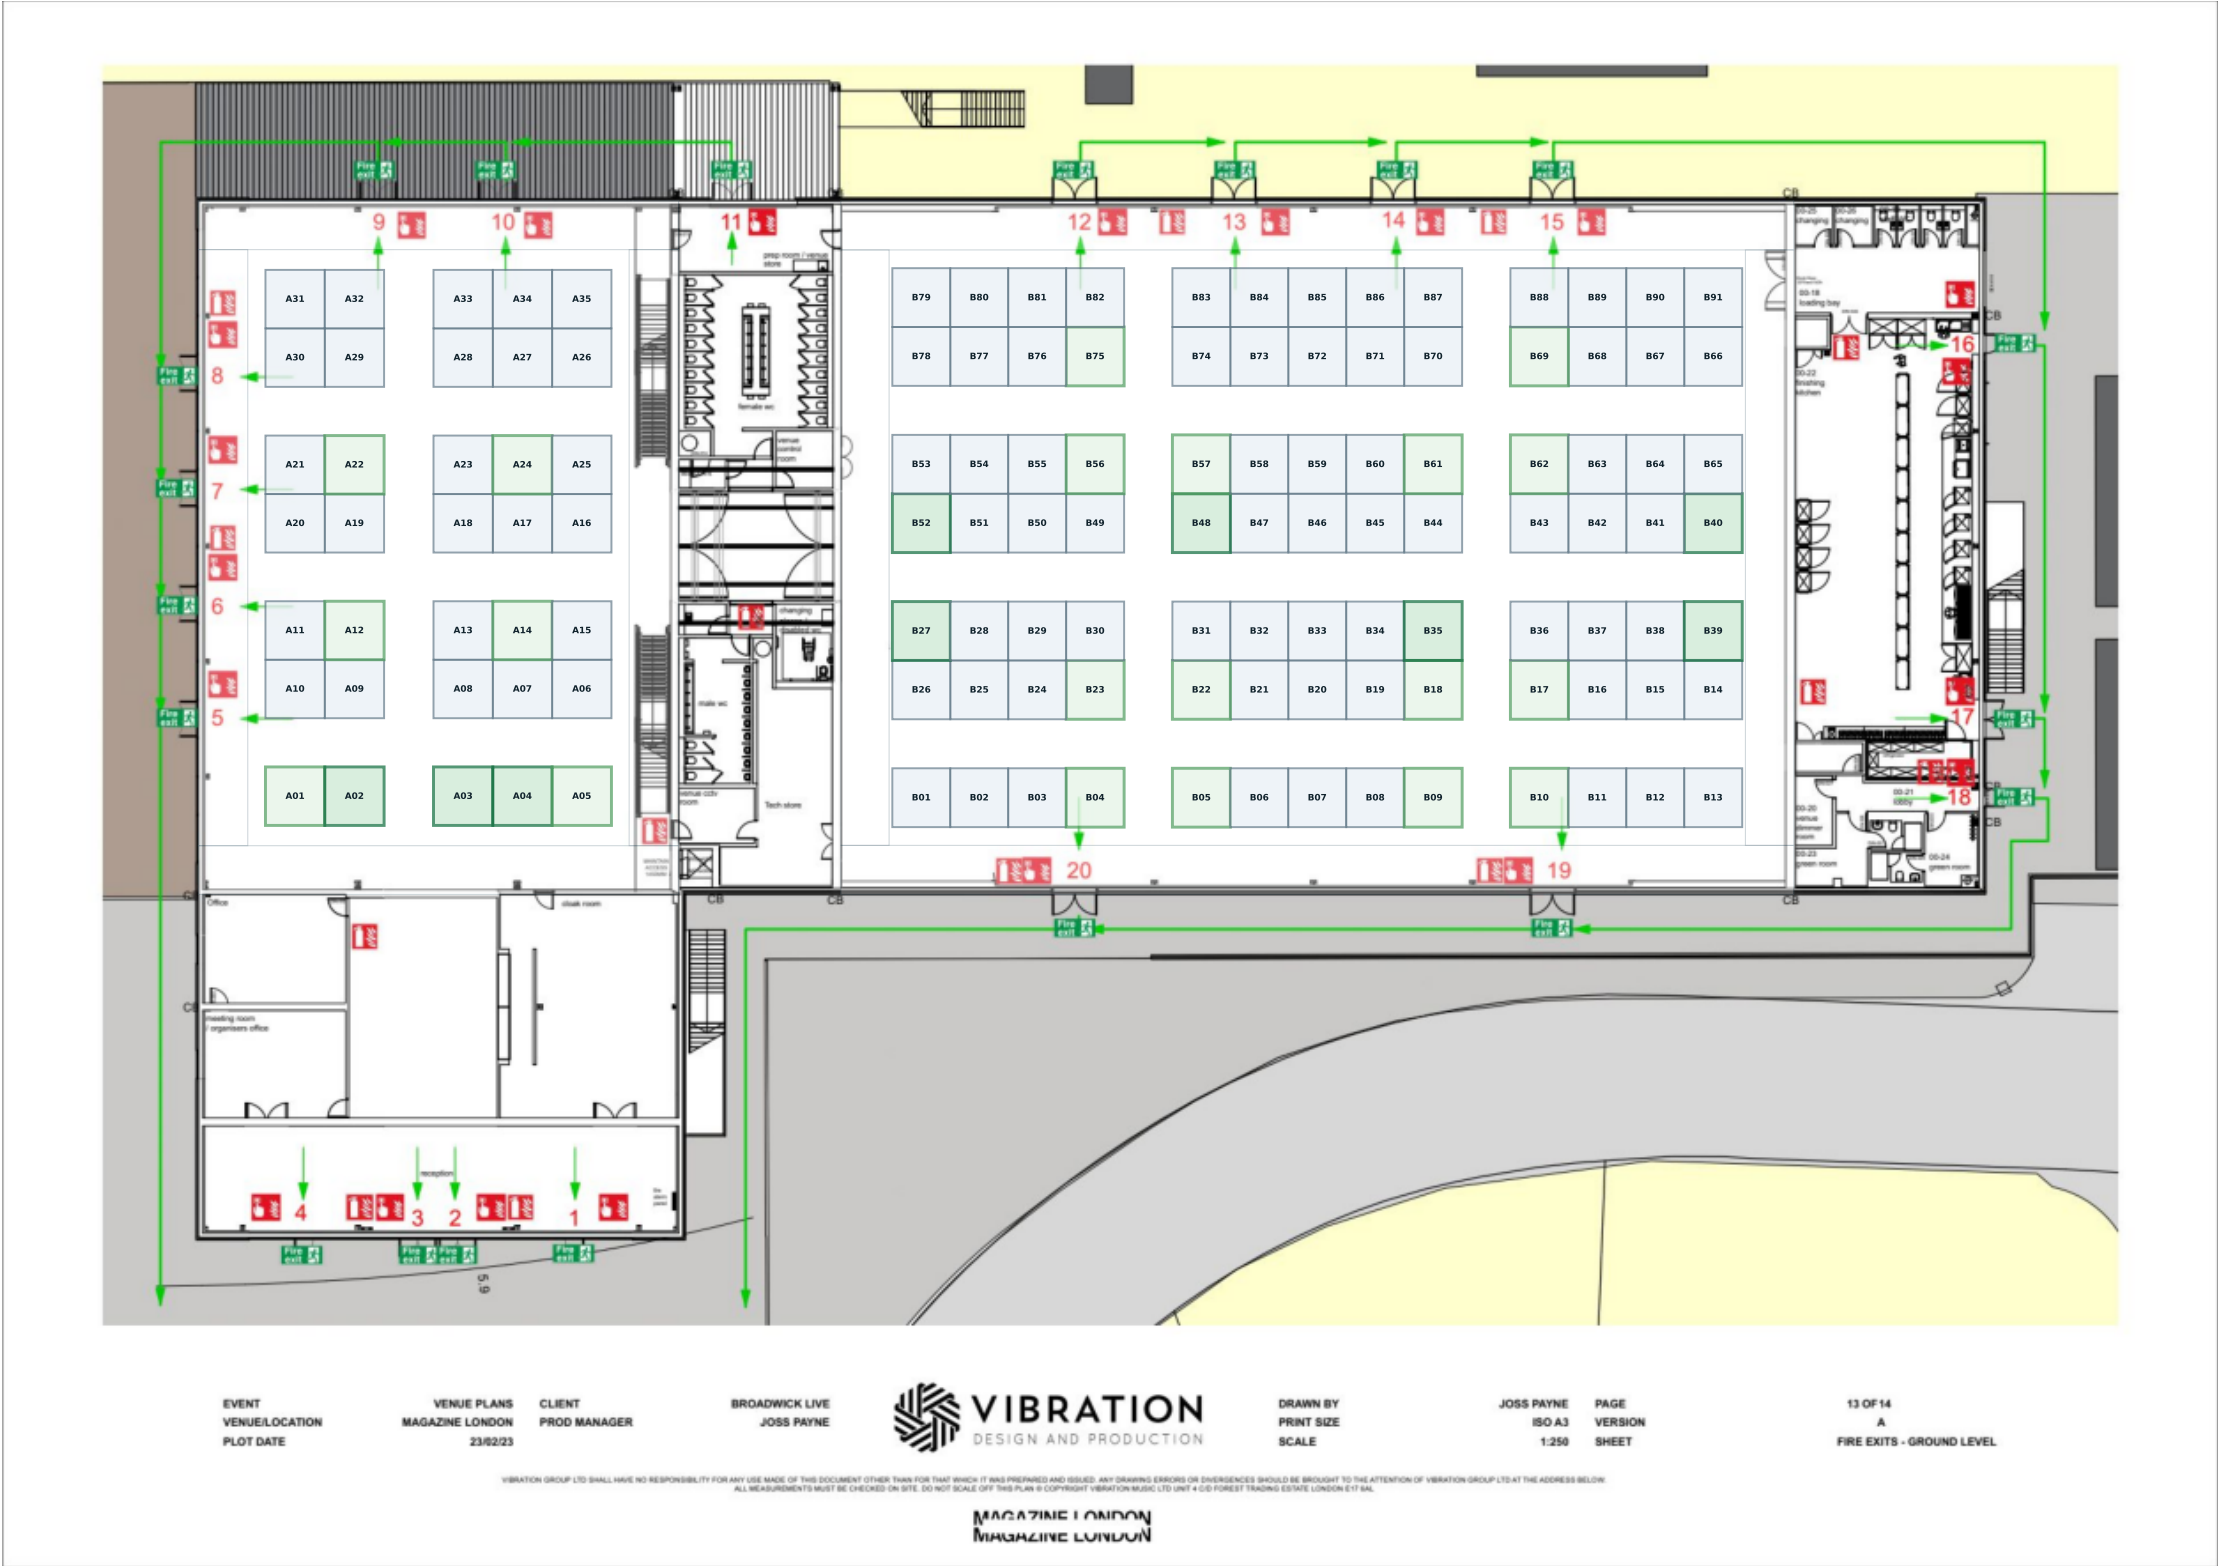

EXTERIOR SITE PLAN

UKIEE 2027 - FIRE / EGRESS COORDINATION OVERLAY

2.5 m gangway grid overlaid on the supplied Vibration ground-level fire-exit drawing. Exit approaches remain outside booth footprints.

Important: source Vibration drawings themselves state that measurements must be checked on site and the printed plan must not be scaled. Booth geometry is dimension-driven; this overlay is for coordination and visual verification.
